Subject: Water Quality

=====

Jerry we received a load of grinding aid Wednesday February 24, 1993. Tuesday, February 23, 1993 a refractive index check on the grinding aid containment basin water, which had an approximate level of 12 inches showed 0.0 refractive index. The basin was subsequently pumped out in preparation to receive the new grinding aid shipment. The receipt of the grinding aid was routine with no spills.
